

Arts and Culture

As part of our commitment to educating the complete child – mind, body and spirit – Our Lady of the Lake School offers an array of arts and culture programs. The arts foster creative problem-solving, encourage flexibility and innovation, and have been shown to improve academic performance across the curriculum, including in math and science. Children who participate in quality arts programs are more successful in school and develop transferable skills that enhance their performance throughout life.

We offer all of our students access to a creative arts program, music instruction, and drama club. Students write and perform their own works, give concerts, create art and learn about our cultural history. They also have opportunities to visit key cultural institutions, to see professional performances, works and exhibits.

We value all of your child's creative abilities, and nurture those talents.

For more information about our quality arts and culture offerings, or to schedule a visit to our school, please call us.
