

Early Childhood through Grade 8

Our Lady of the Lake School provides a program of academic excellence in an environment that engages students, families, staff, parish and community. We challenge our students through STEM programming, a Challenge program, Power of the Pen, Math in Focus and Algebra I. Students enlarge their world with service learning, extracurricular clubs and CYO sports. Students engage in hands-on learning, with interactive smart boards in every classroom and iPads integrated into the curriculum. They also develop their talents through art and music classes, youth choir, and theater. From preschool and throughout their school experience, our students are offered a full array of academic and enrichment offerings to position them for lifelong success.

Community

An anchor in the community since 1926

For more than 80 years, Our Lady of the Lake School has been serving the educational needs of Catholic and non-Catholic students living in Euclid and the surrounding Cleveland area. Our Lady of the Lake School admits students of all races, nationalities or ethnic origins to all rights, privileges, programs and activities. We welcome students of all faiths to our inclusive, engaged learning community.

Academic Program

- Quality preschool offers excellent early childhood preparation
- Strong curriculum that supports Diocesan standards and meets all state and national core standards
- Excellent preparation for high school, college and beyond
- Academic enrichment through the Challenge Program
- Cultural enrichment through art, music and drama
- Physical Education and competitive sports in modern, on-site gym facilities
- Band, Theater Club, field trips and more to expand youth horizons
- Highly qualified teaching staff
- Active, engaged parent community
- Positive, welcoming school culture
- Catholic faith formation, liturgical experiences, religion instruction and service learning

Computer Education

Our Lady of the Lake students receive computer education throughout their school day. Teachers infuse the technology curriculum provided by the Diocese of Cleveland into their lessons. Students in preschool through third grade have access to iPads while fourth through eighth graders use Chromebooks. The use of this technology allows students to gain access to a variety of resources such as Newsela, Reading A-Z, and Edmentum just to name a few. Having all of these devices and subscriptions supports Our Lady of the Lake's mission of educating 21st century learners.

STEM Education

One of Our Lady of the Lake students' favorite part of the week is their time spent in the STEM lab. Students have the freedom to build, design, test ideas, and create whatever comes to their imaginations. They use their problem based learning skills while learning how to code using Beebots and other robots. Students in the upper grades are exposed to the design process involved using the 3-D printer. Students in the younger grades get to see their designs come to life with Osmo activities. Our STEM lab is an ongoing development project for our school in order to provide the highest quality of STEM education.
